## NOTICE of Improvement of Drawer

For quality improvement of drawers of middle & large size safes model 060-130, current drawers are to be modified in design and reinforced with new 265mm long slide rails. The features of improvements are described hereunder.

1. Drawer front face is designed simple grip with a cam lock, which is considered useful. It is confirmed that users can use the cam lock on drawer continuously.
2. When moving the improved drawer back and forth, there is no noise caused by friction. It works smooth with keeping flat and steady thanks to new slide rails.
3. Drawer's weight allowance increases up to 39kgs, 2.6 times more compared to current one's 15kgs.
4. We applied improved new drawer as of Nov. 18. 2019.
